

Privacy Policy

Last updated: October 16, 2018

SatelliteAR app is owned and operated by Analytical Graphics Inc. (“AGI”). Your privacy is very important to us and we are committed to protecting anything you may submit via our mobile application. This Privacy Policy informs you of how we collect, use, and disseminate your information.

1. Declaring permission regarding data collected: We do not collect any personal information of yours that would enable us to link the data collected to identifying who you are. Our app is used anonymously.

Access to your location

You will be asked permission to access your location (precise or approximate) in order to provide you information about the satellites currently flying overhead. Without this information, we will not know your latitude and longitude for the calculations to run, and you will not be able to use this app. If you prefer not to provide your exact location, you can manually select a nearby city instead (approximate location). The approximate location is stored on your phone and you can delete it at any time. If you do not wish to provide your location at all, please refrain from using this app. We may store an anonymous residual copy of your location data on our backup servers.

Access to the Internet

You will need to have an active internet connection to use this app. Without one, we will not be able to receive necessary computations from our server. By accessing this server, your IP address will appear in the logs of our SatelliteAR server. We do not use this information in any way, however it will remain in our backup systems for a limited time.

Access to your camera

You will be asked permission to access your camera. This is completely optional and the app will work even if you do not allow access. It enables an augmented reality effect by interposing satellite icons with the background of where the camera is being pointed at. This is visually more pleasing, but not necessary for the app to run.

2. What we do with this information

Absolutely nothing. We do not run any statistics, nor sell or provide your information to third parties. We only retain IP information in our backup system for a limited time, which is necessary to the functioning of our server.

3. Children Under 13

SatelliteAR App does not knowingly collect personal information from children under the age of 13. If you are under 13, please do not share any data through this app.

4. Changes

We may update this Privacy Policy from time to time, and such updates will be posted on this page.

5. Consent

By using this app, you consent to the terms of this Privacy Policy.

6. Contact us

If you have additional questions or concerns about our policy or our information practices, please feel free to contact us at info@agi.com. If you contact us directly, we will obtain your email address, however, we will only use that to respond to your inquiry.
